

Power Apps and Power Automate Quickstart

Harness the power of your organisation's data and create better experiences for your employees and customers with Power Apps and Power Automate.

In our **Quickstart package**, we help you get up and running with Power Apps and Power Automate, develop a framework for success and start developing low code solutions.

Our approach

Workshop

We will work with you to establish the current structure, practice and processes in your business.

The output will allow for the development of your current business strategy and our team will develop and prepare governance and best practice documentation for this including practical steps for its implementation across a range of project types and scopes.

Findings report

The documentation will include recommendations and industry best practices.

Application Lifecycle Management (ALM)

ALM maturity level, practices and processes. Areas that will form part of this review would include, but are not limited to, the organisations Power Platform environment setup, use of connectors, deployed power apps and flows, security and permissions.

Recommendations

Prepare recommendations for governance and best practice.

CoE toolkit installation

We ensure your business model is optimal and create a Centre of Excellence capability to drive continuous improvement throughout your entire business.

Ongoing consultancy

Our team will supplement your review with up to 5 days consultancy to draw down on any areas as required.

Training

We ensure your business model is optimal and create a Centre of Excellence capability to drive continuous improvement throughout your entire business.

Building a business case

Drive business returns

Categorising your apps

Once projects have been agreed, we'll go through ways a strong business case can be developed

We'll help to identify factors that will drive business returns.

We'll work with you to categorise which apps are critical and what ones would be lightly used.

Why Bridgeall

We are Microsoft Gold Certified for application development and application integration and provide a full range of advice, implementation, licensing, training and support services for your business.
